

Science Fair Entry Form

(If you need more than one form, just put the information on a piece of paper and send that in!)

Name: _____

Partners: _____
(Partners must fill out their own form so their parents can sign it!)

Grade: _____

Description of my project: _____

Parent's Signature: _____

Please Return by: **Friday, March 19th, 2008**

Science Fair

March 5, 2008

K-8

Dear Parents,

The response for the science fair has been terrific! Students from all grade levels are participating. The due date for the entry forms is Wednesday, March 19, 2008. If you have more than one child participating just send an attached note with their information. Here are a few reminders about the projects:

Science Fair Date: Wednesday, April 2, 2008 through Friday, April 4, 2008

Place: The projects will be displayed in the school hallways.

Time: During Conferences after school (School is out at 12:00pm Thursday & Friday)

Display: Limited to 3 feet of table space per project.

Project Due: Wednesday, April 2, 2008 (before school starts)

Questions: Contact Meghan Hoyer or Teri O'Connor

Need Project Ideas??

There are hundreds of wonderful science project ideas available on-line. They are for all age levels and interests. Parents should work with their students to find the best project that suits their child. There are also several books available in our school library filled with many different ideas for all age levels. Some even detail how to set up the display and write a report.

Things to work on this week:

- * Narrow your project idea into a specific question or problem.
- * Get information, take notes about your topic. Use books, magazines, encyclopedias, a computer, and/or interview an expert.
- * Keep a list of your references.
- * Make a hypothesis - an educated guess or prediction about what the outcome of your experiment will be.
- * Plan your project.
- * Make a list of needed materials, and collect them.
- * If working with a partner, plan when to meet and who will be doing what.
