Math 1

Dear families,

Wow! Hard to believe we are at the end of the school year! I wish that we were all together in school to celebrate all the accomplishments your children have made:) They have worked hard, learned how to use tools, how to be resourceful, and so much more. I can't imagine having any other class during this 'distance learning' time. They have amazed me in so many ways-how they have adapted and learned to use numerous online tools/programs! I am very proud of them all:)

The rest of this week (and next), we will be wrapping up the year with a moby max math placement test. This will help show the students all the growth they have made this year! In addition, we will be sharing the recipes we made starting on Monday. Many have made flipgrid videos to show off their cooking/baking. I am looking forward to hearing about their experiences and how they have used math to create something at home!

Over the summer, students will still need to spend two hours on Moby Max math in **August**. The system resets the beginning of August so work done previously will be archived. However, I will assign lessons to help the students catch up on anything we missed at the end of this school year. We were not able to get through every single text book (however we almost made it!). So to help prepare for next year, it would be beneficial to do a little extra practice here and there. They also have the remaining math booklets at home and I'd be happy to send them the lessons if they would like to spend time working on them over the summer!

Again, it was my pleasure working with your children this year! Even though they may not be in my math class next year, I am always around to help:)

Have a wonderful summer! Stay healthy and safe!

God bless,

Katy Korzeniecki
